Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-20 are pending and are examined on the merits.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 7-13 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 98/53083 (in IDS).

WO 98/53083 teaches a nucleic acid molecule comprising a polypeptide encoding sequence of ACC oxidase and a gene suppression sequence having an inverted repeat of a 5' untranslated region (UTR) (page 7) and is at least 21 nucleotides long (page 9) and transformed into a plant, wherein gene suppression is severe (page 15).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

Art Unit: 1638

claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/53083 taken with Helliwell et al (US 2003/0049835).

WO 98/53083 teaches a nucleic acid molecule comprising a polypeptide encoding sequence of ACC oxidase and a gene suppression sequence having an inverted repeat of a 5' untranslated region (UTR) (page 7) and is at least 21 nucleotides long (page 9) and transformed into a plant, wherein gene suppression is severe (page 15). WO 98/53083 also teaches that the inverted repeats can be from a coding sequence or 3' UTR (page 5). WO 98/53083 does not specifically teach using a sequence from an intron for inverted repeats.

Helliwell et al teach that intron containing dsRNA increases the efficiency of gene silencing (page 2 at [0018]).

No claims are allowed.
